

REMARKS

Applicant has amended claim 1 and claim 9 to include a hitch mounted to the frame and has amended claim 1 to indicate that the basket is rotated upwardly to empty the basket. Applicant respectfully requests reconsideration of the rejection based on Tally in combination with Bott. In the Office Action the Examiner is of the position that Tally discloses a device adapted for towing. Tally discloses no hitch mounted to the front of the frame for towing. Rather, Tally does disclose a hitch on the rear for towing of an additional two-wheel trailer. Column 2, lines 30-35. The Examiner is also of the opinion that Tally discloses a link which permits the basket to move for emptying. However, Applicant has claimed a link member which is pivotally attached to the basket and permits the basket to be rotated upwardly to empty the basket. There is no disclosure in Tally which would permit rotation but rather a hook for connecting or disconnecting the basket. Accordingly, Applicant respectfully requests reconsideration of the rejection and allowance of the claims.

If the Examiner has any questions, Applicant's attorney may be reached at (248) 647-6000.

Date: August 8, 2005
